ICS-83-5304

MEMORANDUM FOR: Chief, Administrative Staff, ICS

THROUGH: Deputy Director, Office of Imagery Collection and Exploitation

FROM: [REDACTED]
Chief, Operations Division

SUBJECT: Purchase of Additional Word Processing Equipment [REDACTED]

Action Requested

1. Approve procurement of one additional WANG for O/ICE Operations [REDACTED] during CY 1983. [REDACTED]

Background

2. During CY83, there will be increased needs for administrative support to COMIREX Staff elements (i.e., O/ICE Operations Division) and Departmental Requirements Officers assigned to the Community Support Center (CSC) [REDACTED]

[REDACTED] This growth is in support of the significant increase in activities and personnel associated with the planning for and implementation of, improved imagery intelligence operational capabilities (e.g., CAMS II). Incorporation of the CAMS-2 Tasking Segment into the Operations Division is a major factor in the increased activity. Also, support to the COMIREX Departmental Requirements Officers will increase significantly as the COMIREX agencies increase their staff at the CSC. For the first time, DMA will have full time representation at the CSC, and Program A/OD-4 personnel will also be assigned to the CSC. By FY84 there will be approximately 20 additional personnel in the CSC. [REDACTED]

3. There will be a commensurate increase in the amount of documentation, travel, and general administrative support required. Even today the typing demands are ever increasing as the need expands to distribute documents and papers to O/ICE components, COMIREX committees, and via telecommunications to contractors, as well as offices [REDACTED] involved with planning for the 1984 time frame. The capabilities inherent in the WANG (e.g., dependability, flexibility, and increased productivity) are the only way Operations Division/CSC needs can be met. [REDACTED]

25X1 SUBJECT: Purchase of Additional Word Processing Equipment []

Discussion

25X1 4. The two WANGS currently in Operations Division's CSC inventory are not adequate to support today's demands and will definitely not support the expanded activities and new roles of the future. The two existing WANGS are used continuously by the three secretaries and two part timers as well. []

Recommendation

25X1 5. It is requested that one additional WANG be available for installation when a port in the [] WANG Net (VS 100, WANG System) is available, tentatively expected to be in June 1983. Reconfiguration of the CSC will determine actual installation date. []

25X1 6. The following is a list of required equipment and associated cost: []

25X1 a. WANG 2860-7 ERGO Metric 64K which is a combined word and data processor. This model is interchangeable with both the OIS and VS systems and includes hard sector and soft sector disketts. Cost of the archiving work station is \$8,448. The WANG net option (WN-2) is an additional \$600.00. []

25X1 b. Model CET console table which costs \$150. []

25X1 7. The maintenance for the new WANG equipment is \$73 a month. Additionally, when the existing CSC WANG equipment is switched to [] VS 100 system from the NPIC OIS, the monthly maintenance fee of \$101 will have to be transferred to [] Currently, NPIC/PEG is assuming the monthly maintenance fee for the existing equipment. []
